2017 Pediatric Diabetes Research Consortium (PDRC) 3rd Annual Research Symposium
Call for Posters

The PDRC invites all who participate in diabetes-related research to present their work at a special poster session to be held Thursday, March 30, 2017 during the 3rd Annual PDRC Research Symposium: “Moving the Needle in Pediatric Diabetes Research.” New and existing posters are welcome. The symposium and poster session will be held at the Washington University School of Medicine Eric P. Newman Conference Center in Great Room B.

Scheduling:
There will be two poster sessions from 12:30-2pm and 5-6pm. During this time, we recommend a presenter remain at the display to answer questions and discuss informally the contents of the display. The mounting of the display must be accomplished before noon on Thursday, March 30, 2017 and taken down after 6:00pm. All interested participants are requested to send their poster title(s) and name(s) of contributing investigators to Kathy Corey (corey_k@kids.wustl.edu) by March 23, 2016 at 5:00 pm.

Creating and Mounting your Poster:

- Visuals enhance the effectiveness of your presentation. Think in terms of graphic impact. However, simplicity and legibility are more important than artistic accomplishments. Charts, drawings photographs, and other illustrations are encouraged.

- A heading should be prepared for your presentation using lettering at least two inches high for the title of the presentation. The name(s) of the presenter(s), and their institutional/organizational affiliation(s) should also be included on the heading, but can be printed in a smaller font.

- **ALL lettering** should be easily legible at a distance of (4) feet.

- Do NOT simply print out 8-1/2 x 11 sheets from a PowerPoint presentation.

- The poster board surface is four (4) feet high by eight (8) feet wide

- The most common pre-defined poster size is 42” x 60”

- See the [Poster Instructions](http://pdrc.wustl.edu/Portals/0/2016-Poster_Instructions.pdf) link for printing at [http://pdrc.wustl.edu/Portals/0/2016-Poster_Instructions.pdf](http://pdrc.wustl.edu/Portals/0/2016-Poster_Instructions.pdf)

- Pins or thumbtacks are provided for mounting your display.
